EXPERIENCE

Crest Data System | Software Development Engineer (SDE)

📅 Jan 2022 - Ongoing

📍 Pune

Content Monitoring Tool (CMT)

Technologies: ReactJs, Typescript, Mantine, Python, FastAPI

- Created an automation tool called CMT which has been developed to streamline the work of Splunk Observability team by automating various tasks. This tool enables users to create, update, and delete navigators while providing suggestions for fields through convenient drop-down menus.
- It offers a centralized view of available content and allows users to perform actions such as validating, viewing, and updating JSON with ease. Integrated with Splunk Observability best practices, the tool identifies errors and warnings, providing developers with user-friendly reports for efficient issue resolution.
- Additionally, it supports managing content data from multiple organizations, displaying information on the last update time and user, and facilitating quick navigation to specific organizations.

TruStar: Trustash

Technologies: Python, RestAPI

- We developed TruStashes using the TruSTAR framework, which are third-party integrations, whose data we want to ingest into the TruSTAR platform. Most of the time this data is the Incident Reports.
- Rest API was used to fetch all the incidents/reports and the data was analyzed, filtered, and processed using Python, and reports were submitted on the TruStar Platform.

Super Sapiens | Software Engineer Intern

📅 July 2021 - Jan 2022

📍 Pune

- Worked as **React Frontend Developer** for the company and made contribution to their new Project i.e. Decentralized Content Creation Platform.
- I received praise for my efforts and a LinkedIn recommendation from the company's CEO.

PROJECTS

Querylizer | React, Typescript, Django, RestAPI

- Create **Interactive Database Diagrams**. Easily convert your Diagram to **SQL code** and **download** them.
- The project aims at converting the beautifully handcrafted database **diagrams** to **SQL Queries**. A user can insert **records**, **update**, and **delete** them. They can even download the diagrams in png format.

SyntaxMeets | React JS, Express JS, Socket, Web-RTC, Redux

- It is a **real-time, collaborative** coding platform to group with other members and code. Users **creates/joins** the rooms. A code editor with **19 languages** support and **10+ themes**, **code compiler**, **Drawing pad** to design algorithm, **Chat Box** to discuss and code.

EDUCATION

Bachelor of Engineering

D.Y. Patil College of Engineering

📅 July 2018 - June 2022

CGPA: 9.72

Higher Secondary Education

Jai Hind Junior College, Pimpri

📅 July 2016 - May 2018

Percentage: 85.50 %

SKILLS

Programming Languages

C++ Python JavaScript

HTML CSS

Deployment and Version Control

Git Netlify Vercel

Libraries and Frameworks

ReactJs NextJs Typescript

Django Material-UI Mantine

Bootstrap

Databases

MySQL MongoDB

ACHIEVEMENTS

- Published 2 tech articles on **GeeksForGeeks** and 2 on **Medium**
- Won 2nd prize **Ideathon 2020** organized by **PICT IEEE**.
- Worked as a **Public Relation Officer** for college ACM Student Chapter
